

*Technology services
for real people!*

Distinct from our counterparts our business is designed for customers who don't have an expert in-house IT support function or who prefer to focus management energies elsewhere.

Our mission is keeping you and your information connected despite situations that threaten to interrupt your business.

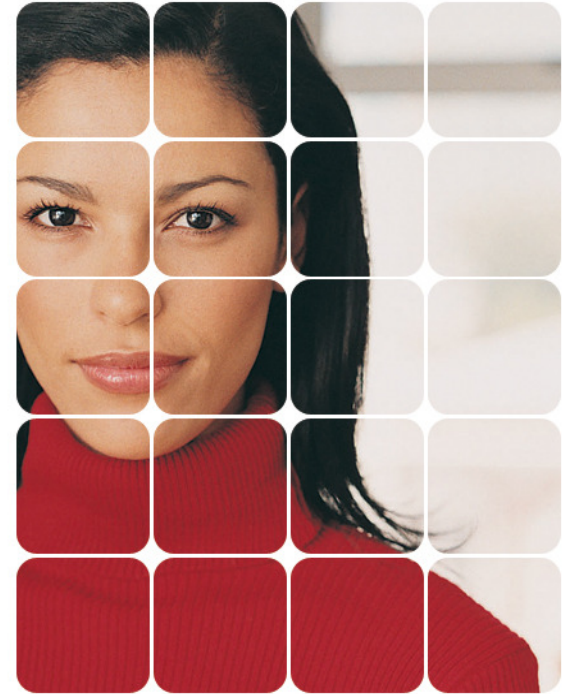

Thus, we combine unrivalled depth of understanding, breadth of experience and scale of operation to deliver a complete continuum of information availability services. This helps keep your business in business, regardless of whether you measure your tolerance to disaster in seconds, minutes, hours or days.

HARDSOFT
Technology Center

Hardware, software, anywhere!

Who are we?

We are a group of seasoned and certified technicians who are passionate about what we do. We recognize the importance of a commitment to foster an environment that empowers, respects, supports our clients and this we believe to be the cornerstone of our success. Our partnership with you begins with a simple service that grows into a time enduring relationship.

What really sets our team apart is that we all possess strong interpersonal skills and have a passion for what we love...technology.

Hardsoft is growing and a part of growth is new team members. Trust that our rigorous recruitment process only allows us to hire the most highly-qualified engineers and support staff.

When it comes to the technology that keeps your employees, suppliers, and customers securely connected, it has to work. You can count on us!

What we do:

We are a team that takes complete responsibility for your overall IT requirements, additionally helping you manage day-to-day IT services, providing long-term advice, and delivering exceptional value.

Our enthusiasm about enabling our customers to focus on their strengths will reliably support them and their colleagues in their business pursuits. This has been our focus for over ten years and we believe we've become quite good at it.

Above all, we recognize that supporting people is as important as supporting technology. And technology is what we do!

Why choose us?

Our dedication to innovation has put us at the forefront of IT service... Here are just a few of the advantages we can deliver... *and we would be delighted to show you more!*

1. **Unrivalled customer service.** Our job is to do the best job for you.
2. **Unparalleled accountability and insight.** Good relationships rely on clear accountability. We ensure that you never feel out of the loop or out of control!
3. **Superior skills matching.** Working with the right people produces superior results. You can be assured that all we are experts in what we do.
4. **Proactive management.** You can only get better if you understand your weaknesses. We think and act ahead which helps us to help you make more informed decisions.
5. **Open, flexible attitude.** We like to listen.

When it comes to the care of our clients, we know you have high expectations. And we have high expectations of ourselves.

From corporate to small business, we do everything we can to live our mission for our clients and to fulfill our promises to them.

**All powered by the minds of
HARDSOFT!**
