***Hardware, software, anywhere!***

## Who are we?

We are a group of seasoned and certified technicians who always make every effort to surpass the standard in care and quality you deserve. Our partnership with you begins with a simple service that grows into a time enduring relationship.

Our Hardsoft service commitment to you is that you will find our team to be Responsive, Reliable, Resourceful, Proactive, and Personable - easy to work with – always!

Our team can provide a single source solution which will consolidate one expert to manage all aspects of your company's IT.

When it comes to the technology that keeps your employees, suppliers, and customers securely connected, it has to work. We understand your unique needs and can design, install, and help you maintain an infrastructure that you can afford.

## THAT'S OUR GUARANTEE!

## What we do:

Whether you have a phone that is not working, computer is slow, want to add another network jack or a phone system installed, then we can help. Our technicians are trained and certified to service, troubleshoot and repair all of your hardware and software needs. We also tackle the more common and complex services including:

- [Internet connection installation](#)
- [Wireless network set-up](#)
- [Business website design and email](#)
- [Small business phone systems](#)
- [Telephone jacks installations/repairs](#)
- [Low voltage wiring installation](#)
- [Business servers and backup](#)
- [Network jacks installation/repair](#)
- [Network maintenance/repairs](#)
- [Desktop/Laptop maintenance and repairs](#)

Discover how HARDSOFT can provide the service and support you need for your home or business at a price you can afford.

**From start to finish, we do it all.  
All inclusive I.T. service at your fingertips!**

## Data or voice jacks:

Many companies only perform selected jobs, such as running cable, but are unable to complete the whole job — often requiring you to hire several companies for cabling, connecting jacks or connecting to equipment. We can perform every part of the job for your network and phone wiring needs.

## Business networking:

New business or an upgrade to your existing network ...this is our specialty. If your current network is running slow or you need a new, complete network installation because you just opened up shop...we can help.

## PC/Network Management:

We can proactively update, backup, and manage all of your computers and servers. If an issue does occur we can spot and fix them before they become a larger problem. You can rest assured knowing your vital data and IT systems are being monitored and protected 24/7. Thus you can spend your time running your business instead of fixing problems.

## Communications:

One of the most important components in running a successful business is having a reliable small business telephone system. With the technology available today, the list of business communications is daunting and virtually endless. We can help navigate the selections and install the right one for you.

**When you need us, we are here!**
